Claims Allowed

Claims 1-6 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the claimed subject matter of: motor driven cargo vehicle with an automated clutch and a transmission between the engine and the vehicle drive wheels, comprising an electronic control unit for controlling the engine, and an electronic control unit for controlling the transmission and the clutch, depending on a set position of a manual gear selector, said control unit being arranged, with the gear selector in a position for automatic shifting at starting off, to select a starting-off gear speed which is determined by a gear selection strategy stored in the control unit, which is dependent on various control parameters fed into the control unit, which comprise at least road incline and vehicle weight, characterized in that the transmission control unit is arranged at starting off to select the highest gear speed making starting off of the vehicle possible with the engine torque available at engine idle speed, introducing an amount of energy from the engine to the clutch amounting, at most, to a predetermined maximum value.

No particular single feature of the claim renders the claim as a whole patentable. Only the claim taken as a whole combination is deemed new and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed concurrently with the application. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.
